Minor point. To be consistent with AP style, we need to spell out "three"

Ron/Dennis

Does this read right (in bold) to you?

EPA's sampling conducted between January and March 2012 did not indicate levels of contaminants that would give EPA reason to take further action. To provide certainty to residents and ensure a thorough and accurate analysis, EPA will resample the four wells where previous Cabot and state data showed levels of contaminants that pose a health concern but where EPA's initial round of sampling data did not detect levels that would require action. **EPA is also following-up with 3 homeowners who expressed interest in sampling but have not yet scheduled a time for the sampling to take place.** Throughout EPA's work in Dimock, the Agency has used the best available scientific data to provide clarity to Dimock residents and address their concerns about the safety of their drinking water.
